

Abstract

The present invention provides a pharmaceutical composition for use as a Th2 differentiation inhibitor comprising a compound represented by Formula (I):

wherein each of ring A, ring B and ring C is an aromatic carbocyclic ring, a heterocyclic ring and the like, X is a single bond, -O-, -CH₂-, -NH-, -SO- and the like, Y is hydrogen, optionally substituted lower alkyl, optionally substituted lower alkenyl and the like, each of V¹ and V² is a single bond, -O-, -NH-, -OCH₂- and the like,

10 a prodrug, pharmaceutically acceptable salt or solvate thereof.
